FOR IMMEDIATE RELEASE: July 21, 2021

More than $80,000 in grants have been awarded by North Valley Community Foundation to benefit survivors of last summer’s North Complex Fire in Butte County.

With the $82,773 in new grants, NVCF has now issued $766,173 in grants for Bear/North Complex Fire survivors.

The grant committee awarded $50,000 — $25,000 apiece to case managers working with St. Vincent de Paul and Northern Valley Catholic Social Service — for an Unmet Needs Fund for fire survivors. Those case managers work with individuals and can tap into the Unmet Needs Fund to help with individual fire recovery plans. Hundreds of fire survivors have registered with the coordinated case management system in cooperation with the Federal Emergency Management Agency and the Bear Fire Long Term Recovery Group.

A grant of $17,773 will help the Butte County Volunteer Fire Department Company 52 in Feather Falls purchase a standby generator, propane tank, water storage tank and other equipment. Company 52 has offered the only on-ground fire support in Feather Falls for more than 30 years but relies heavily upon fundraising and grants for equipment.

A grant of $10,000 will help establish a Wildfire Resource Recovery Center for North Complex Fire survivors. The building at the Lakeside Market Shopping Center in east Oroville will serve as the home to member organizations of the Bear Fire Long Term Recovery Group, giving fire survivors convenient walk-in service for many of their needs. The center will provide access to case managers, crisis counseling and emotional support, and stable internet and computers so survivors can get signed up for county, state and federal services. It also will serve as a location for food and resource distributions, community meetings and more.

David Little, executive vice president, communications. Email: dlittle@nvcf.org, 530-891-1150, ext. 300.
A grant of $5,000 will allow the Berry Creek Community Council to provide shade structures, ice chests and other items to help survivors who are returning to their properties cope with the summer heat.
